

# **The Incinerator**

## **Public Meeting**

**7.15pm, Tuesday 6th October 2009**

**Queens Road Baptist Church,  
Coventry CV1 3EG**

**Coventry City Council is planning to replace the current incinerator located in Whitley with a new one funded by £1 billion of PFI money. It will be built alongside the current incinerator site, taking in waste to burn not only from Coventry, but also from Solihull and Warwickshire, committing each authority's waste strategy for the next 30 years. Will this interfere with recycling rates and how will it effect the environment?**

### **Speaking at the meeting will be:**

**Paul Connett: Emeritus Professor of Chemistry and Expert on Health Impacts of Incinerator Emissions**

**Keith Kondakor: National Waste Campaigner; Alternatives to Incineration and the PFI implications**

**There will be plenty of time for questions and discussion at the end of the presentations.  
Doors open at 7.15pm for tea and coffee prior to 7.30pm start.**
